1Q22: Within expectations

Results in-line; maintain HOLD

1Q22 results were within expectations. YoY earnings growth was largely supported by lower rental assistance to tenants and positive rental reversion at East Coast Mall, but partly dragged by softer performance at Sungei Wang Plaza and 3 Damansara. CLMT offers above-average CY22E net DPU yield of 6.2% (vs sector's average of 5.1%), however we remain cautious over the near-term outlook of its Klang Valley malls. Maintain HOLD with unchanged earnings forecasts and DDM-TP of MYR0.57.

Mixed performance

1Q22 core net profit was MYR20.5m (+167% YoY, +22% QoQ), accounting for 23%/30% of our/consensus' full year estimates. Higher YoY earnings were mainly lifted by; (1) lower rental supports to tenants, (2) positive rental reversion at East Coast Mall (+17.1%), (3) sustained occupancy rates at Gurney Plaza and East Coast Mall (95.9% and 97.7% respectively), and (4) reversal of provision for doubtful debts from improved receivables collection. These, however, were partly offset by softer performance at Sungei Wang Plaza and 3 Damansara from negative rental reversion (-12% and -38.6% respectively). Portfolio occupancy slightly declined to 79.5% (1Q21: 85.1%) largely due to exit of a supermarket anchor at 3 Damansara.

Earnings forecasts unchanged

We maintain our FY22-24E net profit forecasts of MYR88-95m, whereby earnings growth is mainly backed by stable occupancy rates at Gurney Plaza (63% of 1Q22 NPI) and East Coast Mall (29% of 1Q22 NPI).

Still cautious on Sungei Wang Plaza

We remain cautious on Sungei Wang Plaza which could limit near term earnings growth. However, in the long-run CLMT's portfolio is still backed by its outstation malls i.e. Gurney Plaza and East Coast Mall. Looking forward, CLMT's investment growth is expected to extend beyond the retail sector i.e. logistics and industrial asset classes.

Risk statement

There are several risks to our earnings estimates, target price and rating for CLMT. Changes in rental rates, occupancy rates, operating expenses and interest rates may lead to lower earnings for CLMT. 42% of CLMT's gross rental income is due for renewal in 2022, while 18% of debt is on floating rates. Another earnings risk would be if the impact from COVID-19 becomes prolonged.

Appendix 1

Methodology of our proprietary ESG scoring

We evaluate the ESG ratings based on quantitative, qualitative and ESG targets. We assign a score for each of these three parameters. The overall rating is based on the weighted average of the scores: quantitative (50%), qualitative (25%) and ESG target (25%).

For the quantitative, qualitative and ESG target, the sub-parameters are assigned a score - '0' for data not available, '+1' for improving trajectory, positive change, 'Yes', better than peers or a positive number if historical is not available and '-1' for declining trajectory, negative change, 'No', lower than peers or a negative number. The total of the scores of all the sub-parameters is divided by the total number of sub-parameters is the score of each of the three parameters.

The sub-parameters may be different for different industries depending on the key areas to monitor for each industry. A company should achieve a minimum score of 50 for an average ESG rating.
